SUMMARY

BCA student with strong problem-solving skills and solid Computer Science fundamentals. Experienced in building full-stack web applications using React and Node.js, with internships in Web Development and AI/ML. Currently learning Big Data and Data Science.

EDUCATION

Bachelor of Computer Applications (BCA)	JSPM University, Pune	2023–2026
Class XII (HSC)	Maharashtra Board	68.67%
Class X (SSC)	Maharashtra Board	72%

SKILLS

Programming Languages	Java (DSA), JavaScript, Python
Python Libraries	NumPy, Pandas, SciPy
Data Visualization	Matplotlib, Seaborn, Plotly
Web Development	React.js, Node.js, Express.js, MongoDB, MySQL, RestAPI, Flask
Tools	Git, GitHub, VS Code
Soft Skills	Teamwork, Leadership, Communication, Problem-Solving

INTERNSHIP EXPERIENCE

Full Stack Web Developer – Virtual Internship	May 2025 – Jul 2025
--	---------------------

- Developed full-stack applications using React and Node.js.
- Designed REST APIs and optimized database queries.

Google AI-ML Virtual Internship	May 2024 – Jul 2024
--	---------------------

- Learned supervised and unsupervised learning with model evaluation techniques.
- Performed data preprocessing, model training, and analysis on real-world datasets.

CERTIFICATIONS

- Full Stack Web Development
- Data Science Foundation
- AWS re/Start Graduate

PROJECTS

Flash IDE – AI Powered Code Editor (*React, Node.js, Gemini API*)

Developed an AI-powered web-based code editor with secure and scalable backend APIs. Built a responsive frontend and integrated AI-based code generation features to enhance developer productivity and streamline coding workflows.

LodgeStay – Property Rental Platform (*HTML, Node.js, Express.js, MongoDB*)

Developed a full-stack property rental platform that supports user authentication and complete CRUD functionality for property listings. Implemented role-based access control and integrated cloud image uploads using Multer and Cloudinary to efficiently manage property images.

Disaster Helper – Hackathon Project (*Node.js, MongoDB*)

Built a disaster-relief coordination platform that allows volunteers to register, donate resources, and send SOS alerts during emergencies. Implemented secure authentication and dynamic content rendering to ensure reliable and efficient disaster management support.
